

Liberty Caps and toadstools

Posted by - 28 Jul 2007 15:02

Hello every one. Its almost august and time for the magical little liberty caps to be fruiting. Does anyone kno where exactly one could find these fungi? and also where exactly might i find an amanita muscaria? ive looked and found many red ceasar mushrooms but no amanitas. Ive also found these picular orange mushrooms which i need help identifying (see my other post)
